JULY, 2025

## WASTEWATER PROGRAMMES

### Response to Wastewater Challenges

Local stakeholders unite to tackle wastewater challenges through peer exchange, strategic planning, and capacity development, reinforcing regional cooperation and sustainable water management.

### First deliveries of WW Trainings

done in close cooperation with the APUCs and LGAs, reflecting a shared regional commitment to improving wastewater infrastructure, compliance with EU standards, and inter-institutional collaboration.

### Communities of Practice (CoPs)

bringing together wastewater practitioners across the region, fostering peer exchange, joint problem-solving, and stronger advocacy for improved wastewater services.

### Building Local Training Capacities

Through Generic ToTs, RCDN partners empower local trainers, enabling sustainable capacity development and knowledge transfer within the sector.

### Regional Expertise in Access to Financing

Utilizing the knowledge to improve financial planning, tariff setting, investment readiness, and funding opportunities to secure long-term sustainability.

### Innovative Water Projects

New joint initiatives by RCDN partners aim to modernize the Western Balkans' water sector through smart, innovative approaches.

### Strengthening Water & Sanitation Committees

Water & Sanitation Committees now have tailored guidelines to improve institutional capacity, cooperation and policy dialogue.

### Young Water Professionals

YWPs across the region unite to strengthen collaboration, share ideas, and amplify their voice in shaping the future of the water sector.

### Smarter Data Management

Newly developed DMF, designed to help associations make evidence-based decisions, improve member services, and strengthen policy advocacy.

### Advocacy Efforts to Shape WSS Reforms

Through targeted advocacy campaigns, RCDN partners advance reforms to improve governance, regulation, and investment in the water sector.
